

Roger Swanson calls himself a “Technology Architect who understands business processes and cost control.” He is a 12-year Navy veteran, including spending many months at a time living underwater on a submarine.

In the civilian sector, Roger has 29+ years of experience in the technology industry, including working with the Secret Service to resolve a corporate espionage incident.

For his current position as Senior Account Manager for AT-NET Services, he helps companies plan and safeguard their network infrastructure through his system business recovery expertise. A long time Project Manager successfully completed projects with small businesses and large enterprise projects alike.

A resident of Charleston, with his wife, three children and seven grandchildren, he considers himself to be a truly blessed man.

Roger holds a bachelor degree from Southern Illinois University, an Associates in Electronics and several internationally recognized certificates.
